

## **MOC 50507A: Designing IT Process Automation with Opalis Integration Server**

**Number of Days:** Three (3)

This 300-level, three-day, instructor-led course gives students the knowledge on how to implement IT process automation using Opalis Integration Server (OIS).

### **Prerequisites:**

This course is intended for Enterprise System Engineers, Administrators, and System Integrators who need to implement a Dynamic Datacenter using Opalis Integration Server.

### **Instructors:**

The instructors that deliver this course are experienced, enterprise consultants who have extensive experience with Opalis Integration Server. All of our instructors have real-world expertise and are both accomplished consultants and excellent presenters that make the delivery interesting and provide insight into real world issues that they have had to provide solutions to.

### **Description:**

After completing this course, students will be able to:

- Describe the logical architecture of an OIS infrastructure
- Articulate the functions of the components and services in an OIS infrastructure
- Configure error handling in OIS policies
- Troubleshoot issues with OIS components and OIS policy execution
- Explain Microsoft best practices for Policy Lifecycle Management
- Design end-to-end process automation incorporating System Center products
