

**Length:** 3 Days

**Overview:**

This 3-day instructor led course is designed to introduce the attendees to Windows PowerShell. This course has been designed based on the assumption that the students have no previous programming background but that they have some experience with command shells like cmd.exe and/or Unix shells.

The Windows PowerShell course is broken down into the following seven chapters and is delivered in a workshop format where attendees will walk through the examples in the book with the instructor to ensure they leave with a solid understanding of PowerShell.

Chapter 1: What is PowerShell?

Chapter 2: Customizing PowerShell

Chapter 3: Scripting PowerShell

Chapter 4: PowerShell Scope and State

Chapter 5: The PowerShell Toolkit

Chapter 6: PowerShell and Operating System Components

Chapter 7: Exercising PowerShell
